Maximum Marks	4 Marks

Empathy Map

This empathy map represents the perspective of a farmer selecting a crop to cultivate. It helps understand the farmer's needs, concerns, actions, and emotions so that OptiCrop's machine learning system can provide faster and more reliable crop recommendations.

SAYS	THINKS
- I want to choose the right crop for my land. - I hope this crop gives me a good yield. - I need simple, practical guidance, not complicated science.	- Will this crop actually suit my soil and climate? - Am I using my land and resources efficiently? - Can I trust this recommendation over my own experience?
PERSONA NAME Farmer (End User) (Customer/User)	
DOES	FEELS
- Enters soil nutrient values (N, P, K) and climate data into OptiCrop. - Reviews the recommended crop, growing season, and farming tips. - Uses the recommendation to decide what to plant next season.	- Worried about crop failure from picking the wrong crop. - Confident when guided by data-driven recommendations. - Relieved to have clear, actionable farming tips.
