

Customer Journey Map

Date	14 July 2026
Team ID	
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Customer Journey Map

Mapping out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage1	Stage2	Stage3
Actions	User opens the OptiCrop web application and enters soil parameters (N, P, K, Temperature, Humidity, pH, Rainfall).	The Flask application sends the input to the trained Random Forest model, which predicts the most suitable crop	The system displays the recommended crop along with crop image, growing season, water requirement, and farming tips.
Touch point	OptiCrop Home Page / Find Crop Page	Flask Backend & Machine Learning Model	Result Page
Customer Thought	"I hope the system recommends the best crop for my field."	"The prediction is being generated based on my soil data."	"Now I know which crop is suitable for my land."
Customer Feeling	Curious and hopeful	Interested and confident	Satisfied and informed
Process Ownership	User Interface (Frontend)	Flask Backend & Machine Learning Model	Result Display Module
Improvement Opportunities	Provide input validation and tooltips for each field.	Improve prediction speed and integrate real-time weather data.	Add fertilizer recommendations, nearby market prices, and crop disease detection.
